CREATING SUSTAINABLE VALUE BY INVESTING IN THE INFRASTRUCTURE FOR THE WORLD OF TOMORROW

TINC

Appendix

New shareholder structure

TINC is a limited liability company (NV/SA) under Belgian law, managed by its statutory director TINC Manager NV, TINC Manager NV is controlled by TDP NV, the infrastructure joint venture of Gimv, WorxInvest and Belfius Bank.

Remuneration statutory director

- a) A variable amount of 4% of the net profit of TINC before the remuneration of the statutory director, before taxes, and excluding variations in the fair value of financial assets and liabilities (to be increased with VAT, if applicable)
- b) An additional performance fee when TINC achieves a certain predetermined dividend yield based on a ratchet

TDP NV as service provider

- Fees for investment services (0.75% on the outstanding investments) + fees for administrative services: €3,167,071

Corporate governance

- Member of the Audit Committee
- Member of the Nomination and Remuneration Committee

Participations

A15 Maasvlakte-Vaanplein

A15 Maasvlakte-Vaanplein is a public-private partnership for the construction, financing, and long-term maintenance (DBFM) of roadworks to improve traffic flows and road safety on a 37-kilometre stretch of the A15 motorway south of Rotterdam that runs to and from the port. The project is a PPP based on an availability contract with a total construction cost of approximately €750 million. The public party in the partnership is Rijkswaterstaat, the Dutch executive agency for Infrastructure and Water Management. Construction was carried out by a consortium of construction companies that included Ballast Nedam, Strukton, and Strabag. The infrastructure was completed and taken into operation in 2016. The 20-year maintenance period runs until 2036.

Stake

24%

Brabo I

Brabo I is a public-private partnership set up for the construction, financing, and long-term maintenance (DBFM) of light rail infrastructure in the eastern part of Antwerp (extensions to Wijnegem and Mortsel/Boechout) and a maintenance depot in Wijnegem. The project provides a fast light rail link between Antwerp city centre and the more remote municipalities around the city. It enables e.g. a fast connection between the shopping centre in Wijnegem and Antwerp city centre. With a total construction cost of around €125 million, the project was developed by a consortium of construction companies that included Besix, Frateur-De-Pourcq, and Willemen and has been operational since 2012. A fee will be paid to the project over a period of 35 years (until 2047) for providing the infrastructure to De Lijn public transport operator and Flanders' Roads and Traffic Agency.

Stake

52%

Participations

Higher Education Buildings

Higher Education Buildings is a public-private partnership created for the development, financing, and long-term maintenance (DBFM) of new university buildings at six locations in Ireland. With a total budget of €250 million, this project will deliver roughly 38,000m² of new space on campuses to accommodate 5,000 additional students.

The project is handled by a consortium made up of Irish construction group JJ Rhatigan & Company and Sodexo, with the latter taking care of maintenance and facilities services. This 25-year project, that will run until 2050, will become available later this year.

The 25-year project, which will run until 2050, will be operational in 2025.

Hortus Conclusus

Hortus Conclusus is a public-private partnership for the realisation, financing and long-term maintenance (DBFM) of a prison for 440 detainees in Antwerp. The project is a PPP based on an availability contract with a total realisation value of approximately €200 million. The public counterparty is the Regie der Gebouwen. It will be realised by a consortium of the contractors Jan De Nul and EEG. The project will be operational mid-2026 and has a duration of 25 years (until 2051).

Stake

Participations

L'Hourgnette

L'Hourgnette is a public-private partnership for the construction, financing, and long-term maintenance (DBFM) of a detention centre for 300 detainees in the Belgian town of Marche-en-Famenne. L'Hourgnette is responsible for providing the infrastructure and various support services, for which it receives an availability fee from the Belgian Federal Government Property Agency. L'Hourgnette has engaged a consortium of contractors that includes Eiffage and Sodexo to operate the infrastructure and provide the support services. The project with a total construction cost of around €60 million has been operational since 2013 and will run for 25 years (until 2038).

Stake

81%

Princess Beatrix Lock

The Princess Beatrix Lock is a public-private partnership for the construction, financing, and long-term maintenance (DBFM) of the Netherlands' largest inland navigation lock. Located in the Lek Canal, the most important waterway connection between the ports of Rotterdam and Amsterdam, the lock is used by around 50,000 vessels per year.

The project is a PPP based on an availability contract with a total nominal value of approximately €178 million. The public party in the partnership is Rijkswaterstaat, the Dutch executive agency for Infrastructure and Water Management. Construction was handled by a consortium of construction companies that includes Besix, Jan De Nul, Heijmans Infra, and Martens & Van Oord aannemingsbedrijf. The infrastructure was completed and taken into operation in 2016. The 30-year maintenance period runs until 2046.

Stake

40.63%

Participations

Social Housing Ireland

Social Housing Ireland is a public-private partnership for the construction, financing, and long-term maintenance of the first development of social housing units around Dublin. Building work was completed in 2021.

The public-private partnership with the Department of Housing and Dublin City Council includes 534 residential units at six locations in the Dublin area, on Ireland's east coast. The urgently needed new dwellings, which form part of a wider plan to tackle Ireland's housing shortage, were built by John Sisk & Son. Choice Housing is responsible for maintenance and service provision.

The project has a construction cost of approximately €120 million, and a fee will be paid for the provision of the residential units over the 25-year contract term (up to 2046).

Stake

100%

SPI.R0

SPI.R0 is a public-private partnership for the construction, financing, and long-term maintenance (DBFM) in relation to the redevelopment and maintenance of the Brussels Airport interchange on the Brussels Ring motorway.

The consortium consisting of the contractors Jan De Nul and Willemen, and TINC is responsible for the design, the building, the financing and the maintenance of the infrastructure in return for availability fees paid by the Flemish Agency for Roads and Traffic.

The project with a value of around €350 million has a term of 34 years (until 2058). Construction works started in October 2024 with availability expected in 2028.

Stake

45%

Participations

Via A11

Via A11 is a public-private partnership for the construction, financing, and long-term maintenance (DBFM) of a 12-kilometre motorway link to connect the port of Zeebrugge with inland areas. This road was opened early September 2017.

The construction cost of the project was approximately €450 million. Via A11 NV is responsible for providing the infrastructure, for which it relies on a consortium of contractors that includes Jan De Nul, Aswebo, Franki Construct, Aclagro, and Algemene Aannemingen Van Laere. The project has a term of 30 years (up to 2047).

Stake

39.06%

Via R4 Ghent

Via R4 Ghent is a public-private partnership for the closure, financing, redevelopment, and long-term maintenance (DBFM) of the R4 ring road around Ghent. The construction cost of the project was approximately €70 million and the redeveloped ring road was opened in 2012. The public party in this partnership is Flanders' Roads and Traffic Agency. Via R4 Gent NV is responsible for providing the infrastructure, for which it relies on a consortium of contractors that includes Antwerpse Bouwwerken (Eiffage), Besix, and Stadsbader. The project has a term of 30 years (up to 2044).

Sunroof

Sunroof consists of 19 solar power generation facilities (17 in Flanders and 2 in Wallonia) with a total production capacity of 11.7 MW. A substantial part of the power is used locally, while the remainder is fed into the grid.

Storm BESS

Storm BESS is a large-scale battery energy storage system (BESS) being realised across two sites in Ruien (Kluisbergen) and Langerlo (Genk) in Belgium. Developed by the Belgian energy company Storm, the project represents an important step in supporting the integration of renewable energy in Belgium by strengthening the flexibility and reliability of the power grid. With a combined capacity of 300 MW and a storage capacity of 1,200 MWh, Storm BESS will temporarily store electricity and feed it back into the grid when required. Operational commissioning is expected from autumn 2027 onwards.

Stake

GaragePark

Headquartered in Blaricum (NL), GaragePark develops and operates innovative multifunctional storage and workspaces.

GaragePark has built and developed more than 50 parks in the Netherlands, with approximately 5,000 individual garage units. These units are an ideal place for SMEs to safely store equipment and stock or to carry out occasional work. GaragePark sets itself apart by offering proximity, 24/7 access, secure and low-maintenance storage units, and by generating its own energy through solar panels. The GaragePark concept is an efficient tailor-made solution for small businesses such as plasterers, painters, plumbers, as well as for online retailers, event organisers, city logistics, and in general for all SME owners. TINC has committed to invest €25 million over the period 2022-2026 as GaragePark develops new parks.

Réseau Abilis

Réseau Abilis comprises a growing network of specialised residences that provide life-long residential care to people with special needs at 26 sites in Wallonia and Brussels in Belgium, as well as in France and the Netherlands. The residences house about 1100 people with a wide range of intellectual disabilities, who live in care units ranging from single-person flats to larger living units, depending on their level of independence. The aim is to integrate the residents into the local community, to allow them to stay connected with family and relatives, and to ensure they receive high-quality care. The residences are operated by around 800 full-time Réseau Abilis employees. For the often life-long care of its residents, Réseau Abilis receives contributions from public authorities. Réseau Abilis then pays an inflation-linked rental fee to TINC for the use of the residences under a long-term agreement. TINC also holds a minority stake in Réseau Abilis itself, which allows TINC to monitor the quality of the care provided.
